

Facility:	
Quarter:	

*Our guiding principles for person-centered dementia care is to support our residents without the use of unnecessary medications:*

	These medications can have serious, life-threatening side effects, such as stroke, falls and pneumonia.
	According to the FDA black box warning, they may increase the risk of death for elderly residents.
	They are not designed to treat many of the symptoms associated with dementia
	When used for staff convenience, they are a chemical restraint

*Our facility has committed to assessing if our resident may have a need they cannot express or be in a situation they don't understand before jumping to a medication.*

***We ask, "Is it for me, or is it for you?"***

***APD=Antipsychotic Drug, PRN=As Needed, GDR=Gradual Dose Reduction***

**Common (APD) Medications:**

**First Generation**
